Subject: Lusher Groundwater Site - Elkhart, IN

Mr. Gunesch,

We were in contact in 2009 about sampling on Zurn-Pex's Elkhart facility. Based on EPA's sampling efforts, we expect to very shortly invite potentially responsible parties to negotiate to hook residents up to City water and pay for vapor mitigation systems for affected residents. Based on the data, Zurn is likely to be one of the parties we contact. More information on Site status can be found at <http://www.epa.gov/region5/cleanup/lusher/>
